Training Requirements for 40 Hour Site Safety Manager Training

As per the NYC Construction Codes – Title 28 General Administrative Provisions, to obtain a Site Safety Manager or Site Safety Coordinator* Certificate applicants must complete & submit to the Licensing Unit a certificate of completion for 40 hours of training. In addition, as per Title 1 Rules of the City of New York 3301-02, to register as a Construction Superintendent*, applicants must complete & submit to the Licensing Unit a certificate of completion for 40 hours of training.

* This course is required depending on the applicant's qualifications.

Audience

Experienced Construction workers, supervisors, and other personnel responsible for construction activities with general knowledge of the New York City Building Codes as it relates to worker and public safety.

Course Description

This course is a comprehensive review of Chapter 33 and the Rules of the City of New York that pertain to public protection. The purpose of the course is to initiate prospective candidates with safe job practices in New York City and to prepare those prospective candidates to take the Site Safety Manager's test.

During the course, students will be introduced to the hazards of working the New York City construction environment and the specific methods and work practices that are necessary on an urban construction site.

Learning Outcomes

Upon completion of this course, the student will be able to:

- Compare roles and responsibilities of New York City Department of Buildings licensed site safety professionals
- Recognize which rules and regulations were promulgated after serious construction accidents in New York City
- Identify safety procedures to protect public and property during construction and demolition operations in New York City
- Define construction fire protection and prevention methods that comply with the New York City Fire Code.
- Describe communication procedures between New York City Department of Buildings and licensed site safety professionals
- Distinguish between the OSHA standards and New York City Department of Buildings Chapter 33 regulations

Completion Requirements

Students are required to complete 100% of the course and actively participate in all learning activities including review quizzes and hands-on exercises.

Students are not permitted to miss more than 4 hours of class time. Should this occur, it is the student's responsibility to contact USIS to schedule a make up session or arrange to attend another scheduled event. Student will not be eligible to receive certificate of completion without making up missed time.
