Prerequisites

There are no prerequisites needed to attend this course. Students must be able to verbally communicate with instructor in primary language of the training.

Training Requirements for 8-Hour Site Safety Manager Refresher

Per the DOB's recent amendment to section 104-06 of the Title 1 of the Rules of the City of New York, effective as of 5/25/2017, a Site Safety Manager or Site Safety Coordinator must complete a Department approved 8-Hour Site Safety Manager Refresher Training Course one year immediately prior to the license or certificate expiration.

This course is a renewal requirement for the holder of a NYC Department of Buildings Site Safety Manager of Site Safety Coordinator Certificate. Site Safety Manager license holders must successfully complete this course one year immediately prior to renewing their license, which expires every 3 years. Site Safety Coordinator certificate holders must successfully complete this course every year, as the NYC DOB requires annual renewal of the coordinator certification.

Audience

Experienced Construction workers, supervisors, and other personnel responsible for construction activities with general knowledge of the New York City Building Codes as it relates to worker and public safety.

Course Description

The 8-Hour Site Safety Manager Refresher Training course is a refresher to the 40-Hour Site Safety Manager Course, which is a comprehensive presentation of Chapter 33 and the Rules of the City of New York that pertains to public protection. During the training, students will review the hazards of working in the New York City construction environment and the specific methods and work practices that are necessary on an urban construction site.

Learning Outcomes

Upon completion of this course, the student will be able to:

- Compare roles and responsibilities of New York City Department of Buildings licensed site safety professionals
- Recognize which rules and regulations were promulgated after serious construction accidents in New York City
- Identify safety procedures to protect public and property during construction and demolition operations in New York City
- Define construction fire protection and prevention methods that comply with the New York City Fire Code
- Describe communication procedures between New York City Department of Buildings and licensed site safety professionals
- Distinguish between the OSHA standards and New York City Department of Buildings Chapter 33 regulations

Completion Requirements

Students are required to complete 100% of the course and actively participate in all learning activities including review quizzes and hands-on exercises.

Make-up time is not permitted for this training course. Should students miss any portion of the training, it is the student's responsibility to contact USIS to arrange to attend another scheduled event.
