At USIS, we work with leading construction managers, GCs, architects, consultants and MEPS

and seamlessly integrate our solutions with the larger projects at hand.

About us

U.S. Information Systems is a family-owned, third-generation technology services company with roots dating back to 1924. We offer a range of services that meet the most stringent industry standards.

We have 6 main offices and over 150,000 square feet of facility and fabrication space located within 30 miles of New York City
